

BSC (HONS) WEB AND USER EXPERIENCE DESIGN

Whatever the purpose and whoever the user, web design marries the technical with the creative. The pioneers and leaders in this industry over the past 20 years have been both talented developers and left-field thinkers – a combination of creativity and code that has helped shape the modern digital experience.

With an innovative curriculum that ignores the narrow limits of any one discipline, on this course you'll have ample opportunity for collaborating with fellow SODA students – whether they're studying games, photography, animation or sound design (to name a few).
